

Triangle ArtWorks is the center-point for those working in the Triangle arts community. Our mission is simple: help those working in all arts disciplines build successful and sustainable businesses ensuring a thriving arts community so crucial to the vitality of the Triangle region.

In order to thrive, the arts sector needs to be recognized, valued and supported in their work. Through professional training, resources, connectivity and advocacy, we build a stronger foundation for those working in the arts - securing their pivotal role in what makes our growing region a great place to live, work and innovate.

WE MEET THE BUSINESS NEEDS OF THE TRIANGLE ARTS COMMUNITY THROUGH...

Connections

From casual happy hours, to discipline groups gatherings, to lunch & learns, our events bring this community together to share ideas, skills and resources, as well as common joys and frustrations. At our annual SMASH! region-wide event, we bring the community together to kick off the new year, learn about resources, make connections and celebrate the value of the work they do.

Advocacy

Everyday, we work to build the collective power and presence of the arts as a vital business sector by engaging in government, corporate and public forums and by collaborating with these entities.

Professional Training

Our ArtSwell Program delivers business skills workshops, long-form entrepreneurship training, free panel discussions, ArtSwell TV 24/7 videos and more. We provide professional development tailored for artists and arts administrators in all arts disciplines and stages of career development.

News, Tools and Resources

Our website provides "one-stop shopping" for the latest arts business news, tools and resources - including the area's biggest arts job board, arts organization and resource directories, and our news blog - with our comprehensive social media presence connecting it all and delivering up to the minute news straight to your phone or laptop.
